PROFILE SUMMARY

Enthusiastic and self-motivated CSE student with a strong passion for full stack development, UI/UX design and problem-solving. Experienced in building user-focused web platforms and handling both frontend and backend responsibilities. Actively seeking for opportunities to contribute, learn, and grow .

WORK EXPERIENCE

UI/UX Designer & Full-Stack Developer - Venture

Currently working as a UI/UX Designer and Full-Stack Developer at Venture Events. I am responsible for designing intuitive user interfaces and developing key features for their event management platform. My work involves creating wireframes and prototypes, building responsive frontend components, and working on backend functionalities to support event registration and scheduling. I collaborate remotely with the team to improve user experience and ensure smooth platform performance.

PROJECTS

TRAZEX11 - Stock Market Fantasy Platform

- Built a stock market-based fantasy platform where users create 11-stock teams, join contests, and earn virtual coins. Included features like team selection, captain/vice-captain, wallet system, and daily contest rules.

Wallet App - Personal Finance Tracker

- Developed a mobile app for tracking income and expenses with email-based authentication. Features include balance display, transaction history, add/delete transactions, pull-to-refresh, and secure login/logout flow.

QuadFusion - Multi-Feature Web App

- Created a web app combining four features: meals, cocktails, Harry Potter trivia, and a mini banking system. Focused on clean UI and smooth navigation between categories.

Slick - Online Shoe Store

- Designed a modern and responsive e-commerce website for a fictional shoe brand. Focused on clean layout, intuitive navigation, product display, and smooth user experience from browsing to checkout.
